NiviCap Unveils India's First Digital Study-in-Australia Platform; Justin Langer Joins as Brand Ambassador

Bengaluru | November 17, 2025:

In a significant boost to India–Australia education ties, NiviCap on Monday launched the country's first dedicated digital solutions platform for students aspiring to study in Australia. Designed to simplify what has long been a fragmented journey, NiviCap brings loan discovery, forex support, pre-departure preparation and post-arrival assistance onto a single, secure digital interface.

Supported by the Australian Trade and Investment Commission (Austrade), the platform was unveiled by former Australian cricket captain and renowned coach Justin Langer, who was also announced as NiviCap's Brand Ambassador.

His association is aimed at reinforcing trust, reliability and cultural goodwill between the two nations.

Founded by the creator of Ziksu, one of Australia's prominent fintech innovators, NiviCap promises a "Fast. Fair. Family Approved." approach, with a strong focus on accessibility for students from smaller towns. The platform seeks to address longstanding gaps in financing and documentation—issues that continue to challenge thousands of Indian families despite India being Australia's second-largest source of international students, with over 137,700 enrolments in 2025.

"NiviCap is built on empathy and experience," said founder Karthik Srinivasan. "We want students and parents to feel confident, informed and supported at every stage of their study-abroad journey."

Brand Ambassador Justin Langer noted that NiviCap brings the "steady, dependable guidance" students need during crucial decision-making.

Austrade's South Asia Head, Mukund Narayanamurti, in his statement he called the initiative a "timely step that deepens student confidence in choosing Australia for world-class education."

NiviCap will roll out digital education loan services first, with forex and post-arrival support set to follow, positioning the platform as a comprehensive partner for Indian students heading to Australia.
