Digital solutions platform for students aspiring to study in Australia

Chennai | Nov 29: NiviCap, launched with the vision "Fast. Fair. Family Approved - Achieve your Australian academic dreams without financial hurdles," introduces a new chapter in education financing for Indian students. Australia remains a top global destination for Indian learners, known for its world-class institutions, diverse culture, and strong post-study career prospects.

The launch also saw the announcement of former Australian cricketer Justin Langer as NiviCap's Brand Ambassador. The initiative is further supported by the Australian Trade and Investment Commission (Austrade), reinforcing the growing Australia–India education partnership.

Created by the founder of Ziksu Australia, a leading fintech brand, NiviCap connects India and Australia's education ecosystems through a unified suite of non-banking services. The platform supports students and parents through the full journey - from pre-admission to post-arrival - offering loan discovery, application assistance, forex guidance, and onboarding support, all within a secure digital environment. Its blend of transparency, technology, and empathy ensures students enjoy a smooth path to their academic goals, while parents gain confidence and peace of mind.

With India now the second-largest source of international students in Australia - around 137,703 Indian students pursuing studies in 2025 - the demand continues to rise. Yet, education financing remains complex and scattered. NiviCap aims to simplify this process through a single, reliable, and user-friendly platform, particularly empowering families from Tier-II and Tier-III cities to pursue global opportunities with clarity.

Founder Karthik Srinivasan said, "As an Indian-born Australian, I've lived the same journey thousands of students undertake - full of excitement but also uncertainty. Managing documents, finances across countries, and the emotional strain of being far from home can make dreams feel distant. NiviCap was built to bridge that gap."
